Projects

Personal Portfolio Website   **Feb 2023**

The Personal Portfolio Website is a showcase of my skills and experience as a front-end developer. The website's main objective is to provide information about me with an overview of my portfolio, skills, and achievements.

Functionality and Features: The website includes a home section which welcomes visitors with a captivating introduction, guiding them through sections like About, Skills, Education, and Projects, where they can explore my background, expertise, and notable work.

Technologies Used: HTML, CSS, JavaScript   **https://choudharysuhel.github.io/my-portfolio/**

Blogging App

My Blogging App offers a seamless and dynamic platform for content creation and management. Users can effortlessly add, edit, and delete blog posts.

Technologies used: React.js, React Hooks, Firebase   **https://tiny-longma-a9d23b.netlify.app**

Expense Tracker App

My Expense Tracker exemplifies my proficiency in contemporary web development technologies. Built with React.js, React hooks, and Firebase, this application offers users an efficient way to manage their finances. Features like tracking total income, expenses, and transaction history are seamlessly implemented.

Technologies used: React.js, React Hooks, Firebase   **https://deluxe-manatee-2ca564.netlify.app**
